11 Importing an assembly

11.1 Procedure -Importing a module

1. on the File tab, select →  **Import assembly into Teamcenter**.
2. Select **FFG Engineering Item** from the **Default Settings** group in the **Item Type** list.

3. In the **Components** group, select the following:

- * Include Component Parts
- * Include dependent parts

**Tip:**

If you also import component parts and dependent parts, you must select the **Include component parts and Include dependent parts** check boxes before you select the assemblies to import.
